

Stickies from white board at Living Smart – Travel Smart and Peak Oil session 24th June 2009

Reactions to the session and showing of Australia Pumping Empty

one thing I can do at home	one thing C of C can do/ I can do at work	one thing the government can do	one other thing
<ul style="list-style-type: none"> • continue to use car less • walk to shops • don't use car for short journeys and carpool as often as we can • walk to work and shops and ride bike more • walk to shops • design and develop my farm to be an efficient production unit • look at sharing a car (eg 2 days each for 3 people). Become a travelsmart officer. Buy an electric bike • try and walk short distances instead of taking the car 	<ul style="list-style-type: none"> • change lighting back to eco saving • minibus/carpool from central locations eg train station to encourage use of public transport • recommend low petrol use replacement cars • carpooling program. Bonus incentives less travel for staff. Staff bulletin for giveaways, exchanging/ recycling goods, carpooling, sharing • give more incentives to use public transport • purchasing cars with reduced fuel emissions • bonus incentives for not using car and carpooling • encourage subdivisions for high density living. Encourage local farming 	<ul style="list-style-type: none"> • stop making produce that causes the problem • increase bus/train routes. Increase car parking charges • more transport, more shops • legislate to put more taxes and tariffs on high petrol use • improve infrastructure for transport • introduce a toll for if people wish to use their cars, thus reducing the fuel emissions from people using their cars • put more funding onto other resources • more public transport 	<ul style="list-style-type: none"> • people should use public transport or ride bikes to work • develop transport that doesn't use fuel • infrastructure change • enforce walk to work • encourage community gardens • grow own vegies, carpool • recycle pine bollards and posts to farm • educate all young people in schools now about this. This video (Aust Pumping Empty)

<ul style="list-style-type: none"> walk to shops for groceries car pool – anyone? service car regularly so more fuel efficient more public transport. Ride bike or walk on small local trips get the kids to use public transport to get places use car less 	<ul style="list-style-type: none"> use council vehicles more effectively – share, carpool etc public transport and infrastructure change redesign the dpi Cockburn maps. Work thru the travelsmart officer allow shops to be closer to home building regulations eg windows, power, light savings better travelsmart facilities more efficient vehicles 	<ul style="list-style-type: none"> make public transport more efficient, cost effective and coincide with connecting buses infrastructure change – transport more shops and designs structurally transport – express (?) development of more efficient public transport put some logic into import-export. Make public transport cheaper or free of charge invest in good, fast, efficient public transport now. Get car manufacturers to build better lasting cars. Build products that last longer and are more efficient better/more convenient public transport. Develop/expand rail system. 	<p>should be shown on TV and in schools. The young are the future generation and need to learn this now</p> <ul style="list-style-type: none"> make the changes instead of talking about it! plan holiday/house swap. Goodbye Bali! car pool to/from work offer more bus services in the weekend
